

The Institute For Population Health, Inc. (IPH) is celebrating 10 Years of continuous uninterrupted services to the community in Detroit and Metropolitan Area beginning October 1, 2012.

We thank the Governing Board of Directors for their support of this newly created private non-profit 501 (C) (3) since its inaugural Board meeting in 2012 until the current meeting in 2022. The Governing Board has provided strong leadership in uncertain times.

Gwendolyn A. Daniels, DNP, RN
Chief Executive Officer

About IPH

The Institute For Population Health, Inc. (IPH) is dedicated to advancing positive health outcomes in populations and communities. Our actions are guided by our values, which include health equity, leadership, service, innovation, and entrepreneurship. These values are evident in IPH's action on behalf of the clients we serve and our commitment to improving their health status.

IPH is a pioneer in transitioning population health service delivery system into a financially stable, outcome-focused non-profit organization. IPH has provided leadership in the community to innovate new solutions that facilitates the maximum utilization of resources for the benefit of the target populations.

IPH is successful because of the experience, talent, and dedication of its staff, contractors, and administrators.

Join us in celebrating 10 Years of service excellence to the community

- National Council on Alcoholism and Drug Dependency (NCADD)

Positive Health Outcomes

Over the past 10 years the staff of the Detroit Healthy Start Program aimed to reduce infant mortality through the intensive case management of 3,000 unduplicated pregnant women and their families.

As a New Access Point 4,551 unduplicated patients received access to primary care, 10,580 clinic visits, and 1,434 virtual visits provided by Physicians, Mid-level Nurse Practitioners, Certified Nurse Mid-Wives, Nurses, Community Health Workers, Dentist, and Dental Hygienists through the Community Health Center Program in 2021.

As a result of the Self Measured Blood Pressure (SMBP) Remote Monitoring Program, 57% of patients identified with hypertension received control which is an improvement from a baseline of 49% prior to implementing the program in 2022.

As a result of case management and giving away glucose monitoring devices, 42.4% of identified patients with a hemoglobin A1C greater than 9 have received control. This is an improvement from a baseline of 68% of diabetic patients who had a hemoglobin A1C greater than 9.

As a result of universal screening, 96% of patients identified as positive for smoking Tobacco also received cessation education.

HRSA Bureau of Primary Care Uniform Data System (UDS) Annual Performance Report Trends

2019 = 2808 unduplicated patients, 3087 duplicate patients, 5973 visits, and 2 virtual visits.

2020 = 2992 unduplicated patients, 3484 duplicate patients, 8149 visits, and 495 virtual visits.

2021 = 4551 unduplicated patients, 5086 duplicate patients, 10,581 visits, and 1089 virtual visits.
